

Hospital Management System

Hospital Management System using MySQL, Php and Bootstrap

Prerequisites

1. Install XAMPP web server
2. Any Editor (Preferably VS Code or Sublime Text)
3. Any web browser with latest version

Languages and Technologies used

1. HTML5/CSS3
2. JavaScript (to create dynamically updating content)
3. Bootstrap (An HTML, CSS, and JS library)
4. XAMPP (A web server by Apache Friends)
5. Php
6. MySQL (An RDBMS that uses SQL)
7. TCPDF (to generate PDFs)

Steps to run the project in your machine

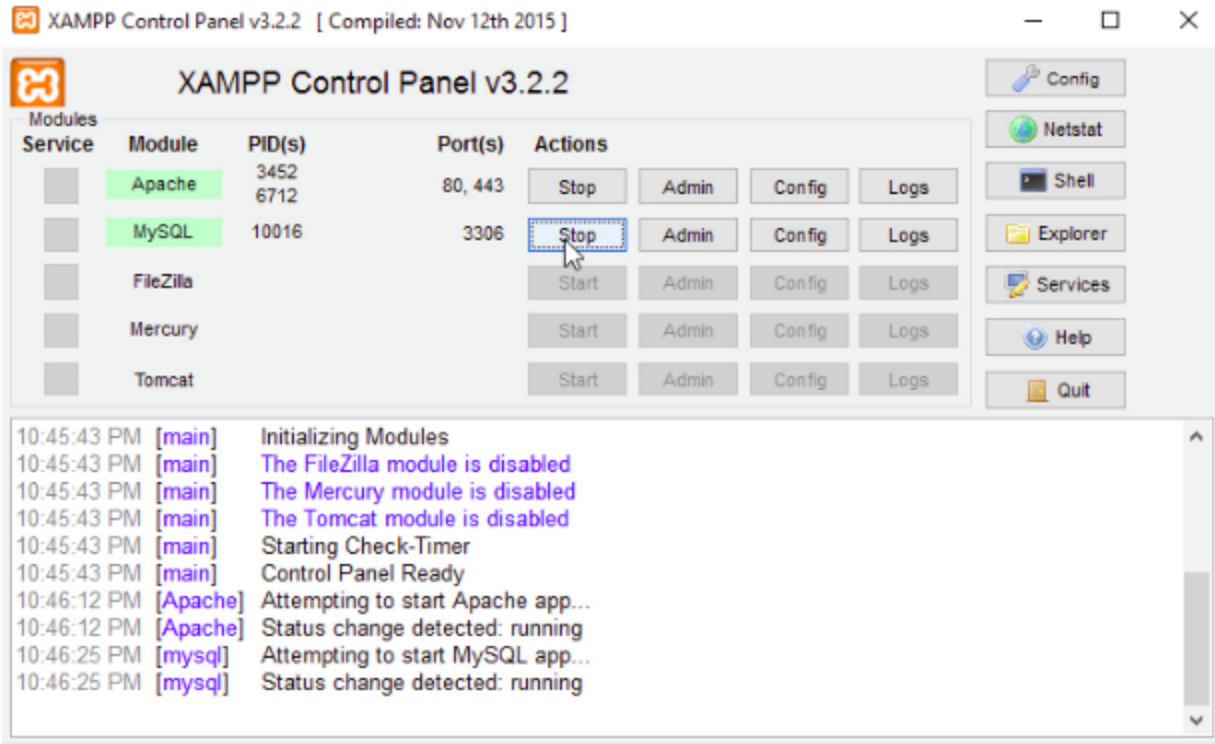

1. Download and install XAMPP in your machine
2. Clone or download the repository
3. Extract all the files and move it to the 'htdocs' folder of your XAMPP directory.
4. Start Apache and Mysql in your XAMPP control panel.
5. Open your web browser and type 'localhost/phpmyadmin'
6. In phpmyadmin page, create a new database from the left panel and name it as 'myhmsdb'
7. Import the file 'myhmsdb.sql' inside your newly created database and click ok.
8. Open a new tab and type 'localhost/foldername' in the url of your browser
9. Hurray! That's it!

SOFTWARES USED

- XAMPP was installed on the Ubuntu 19.04 machine and APACHE2 Server and MySQL were initialized. And, files were built inside opt/lampp/htdocs/myhmsp
- Sublime Text 3.2 was used as a text editor.
- Google Chrome Version 77.0.3865.90 was used to run the project (localhost/myhmsp was used as the url).

Starting Apache And MySQL in XAMPP:

The XAMPP Control Panel allows you to manually start and stop Apache and MySQL. To start Apache or MySQL manually, click the 'Start' button under 'Actions'.

GETTING INTO THE PROJECT:

Hospital Management System in PHP and MySQL. This system has a 'Home' page from where the patient, doctor & administrator can log in into their accounts by toggling the tabs accordingly. Fig 1.1 shows the 'Home' page of our project.

Fig 1.1

'About Us' page (Fig 1.2) allows us to get some more information about the quality and the services of the hospital.

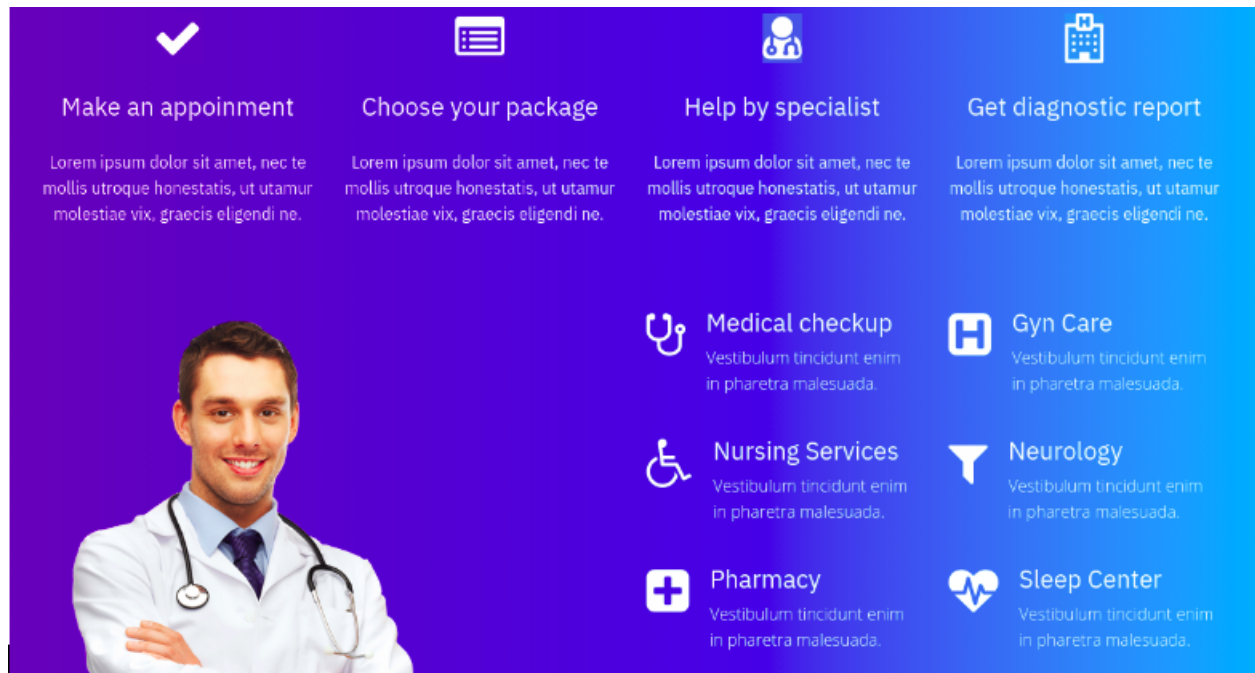

Fig 1.2

'Contact' page allows users to provide feedback or queries about the services of the hospital. Fig 1.3 shows the 'Contact' page.

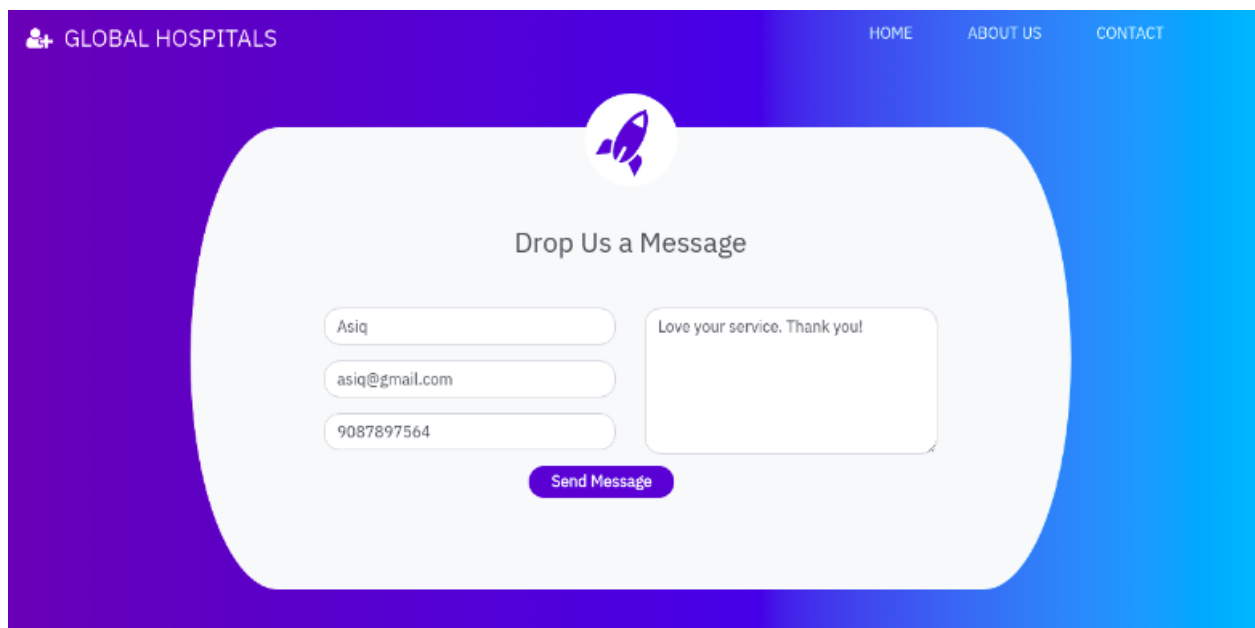

Fig 1.3

The 'Home' page consists of 3 modules:

1. Patient Module
2. Doctor Module
3. Admin Module

Patient Module:

This module allows patients to create their account, book an appointment to see a doctor and see their appointment history. The registration page(in the home page itself) asks patients to enter their First Name, Last Name, Email ID, Contact Number, Password and radio buttons to select their gender.

The screenshot shows the 'Register as Patient' form on the Global Hospitals website. The form is set against a dark blue background with a rocket icon and the word 'Welcome' on the left. The form itself is a light blue rounded rectangle. At the top right of the form are three tabs: 'Patient' (selected), 'Doctor', and 'Admin'. The form fields are arranged in two columns. The first column contains fields for 'First Name' (filled with 'Kenny'), 'Email' (filled with 'kenny@gmail.com'), and 'Password' (filled with '*****'). The second column contains fields for 'Last Name' (filled with 'Sebastian'), 'Contact Number' (filled with '8797868769'), and 'Confirm Password' (filled with '*****'). Below the password fields is a 'Matching' status in green text. At the bottom left of the form are radio buttons for 'Male' (selected) and 'Female'. Below these is a link 'Already have an account?'. At the bottom right is a 'Register' button.

Field	Value
First Name	Kenny
Last Name	Sebastian
Email	kenny@gmail.com
Contact Number	8797868769
Password	*****
Confirm Password	*****
Gender	Male

Fig 1.4

Once the patient has created his/her own account after clicking the 'Register' button, then he will be redirected to his/her Dashboard(Fig 1.5).

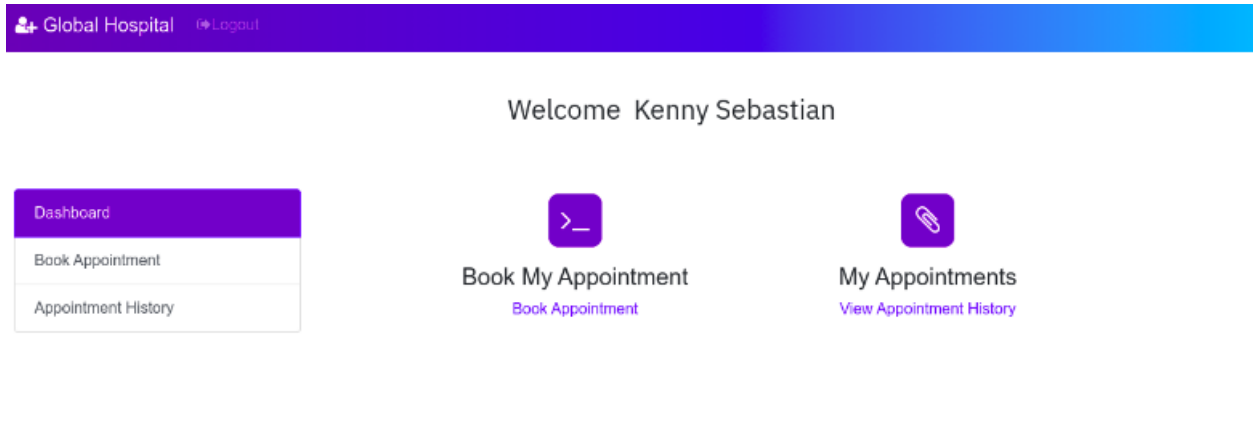

Fig 1.5

The Dashboard page allows patients to perform two operations:

1. Book his/her appointment:

Here, the patients are able to book their appointments to see a doctor. The appointment form(Fig 1.6) requires patients to select the doctor that they want to see, Date and Time that they want to meet with the doctor. The consultancy fee will be shown accordingly to the patient as it was already determined by the doctor.

The image shows the 'Create an appointment' form within the same web application. The header and welcome message are identical to Fig 1.5. The sidebar on the left now has 'Book Appointment' highlighted in purple. The main form area is titled 'Create an appointment' and contains the following fields: 'Doctors:' with a dropdown menu showing 'Ganesh'; 'Consultancy Fees' with a text input showing '550'; 'Date' with a text input showing '10/10/2019'; and 'Time' with a text input showing '10:00'. At the bottom of the form is a purple button labeled 'Create new entry'.

Fig 1.6

After clicking on the 'Create new entry' button, the patient will receive an alert that acknowledges the successful appointment of the patient.(See Fig 1.7)

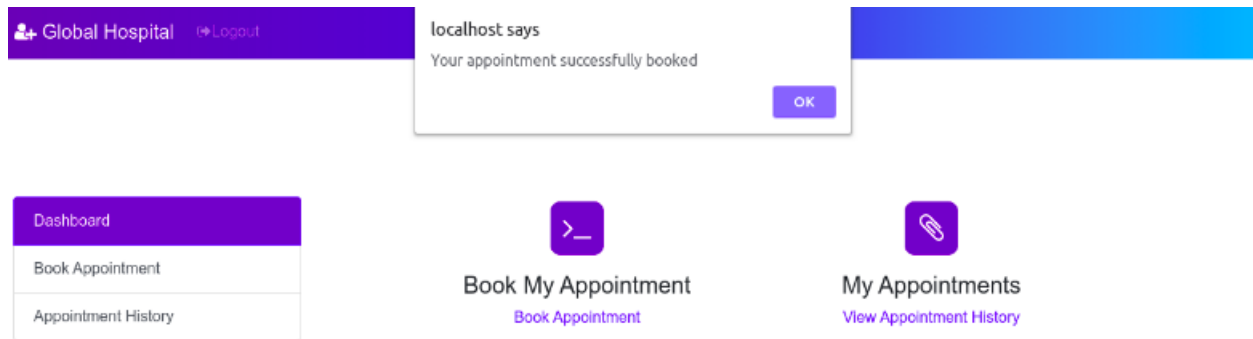

Fig 1.7

2. View patients' Appointment History:

Here, the patient can see their appointment history which contains Doctor Name, Consultancy Fee, Appointment Date and Time.(See Fig 1.8).

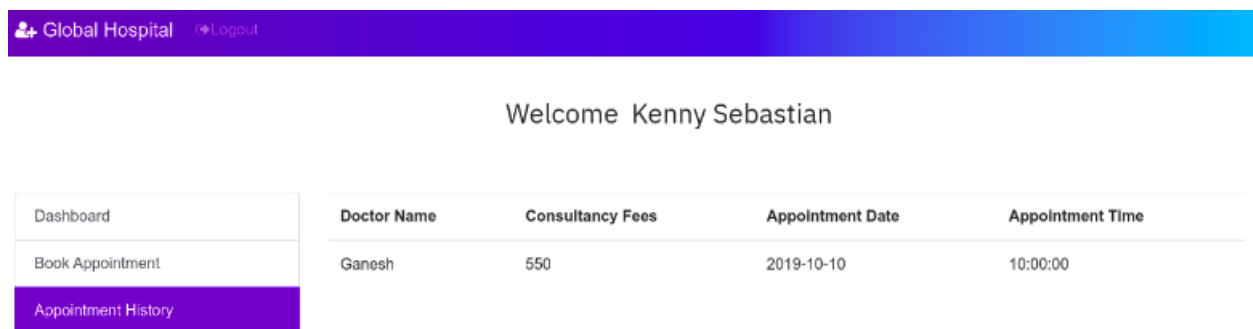

Fig 1.8

Once the patient has logged out of his account, if he wants to go into his account again, he can login his account, instead of registering his account again. Fig 1.9 shows the login page. Clicking on 'Login' button will redirect the patient to his dashboard page which we have seen earlier (Fig 1.5)

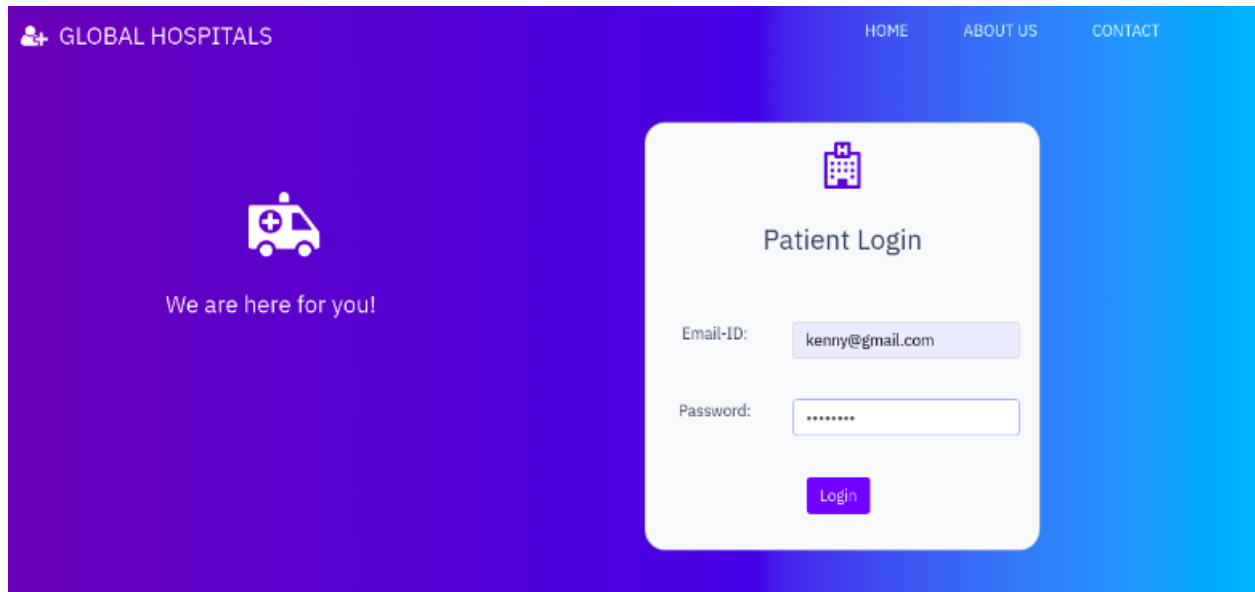

Fig 1.9

This is how the patient module works. On the whole, this module allows patients to register their account or login their account(if he/she has one), book an appointment and view his/her appointment history.

Doctor Module:

The doctors can login into their account which can be done by toggling the tab from 'Patient' to 'Doctor'. Fig 1.10 shows the login form for a doctor. Registration of a doctor account can be done only by admin. We will discuss more about this in the Admin Module.

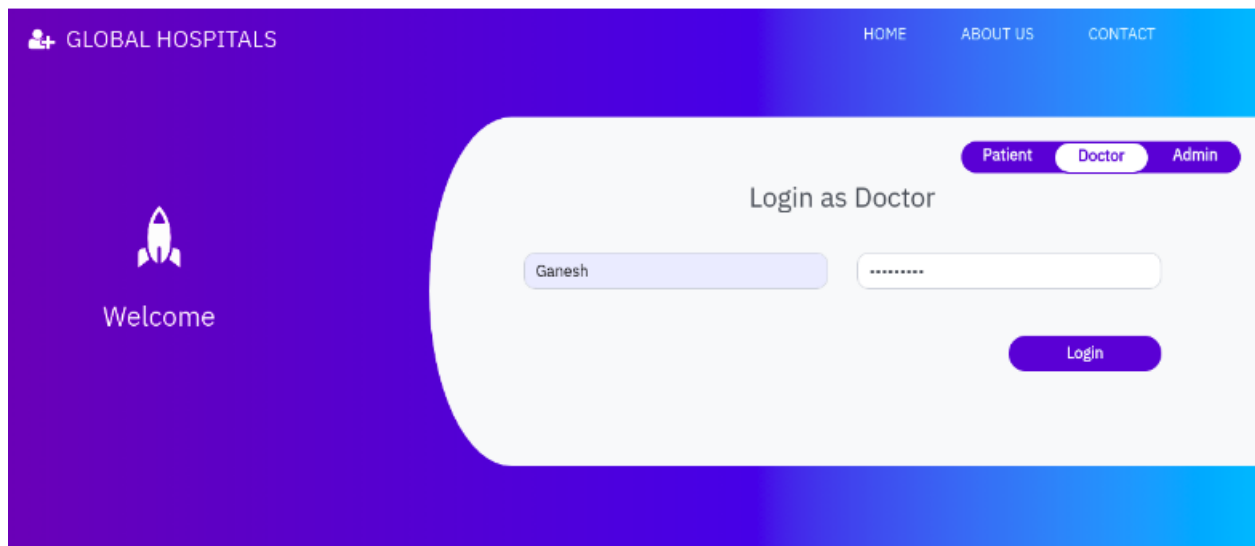

Fig 1.10

Once the doctor clicking the 'Login' button, they will be redirected to their own dashboard which is shown in Fig 1.11

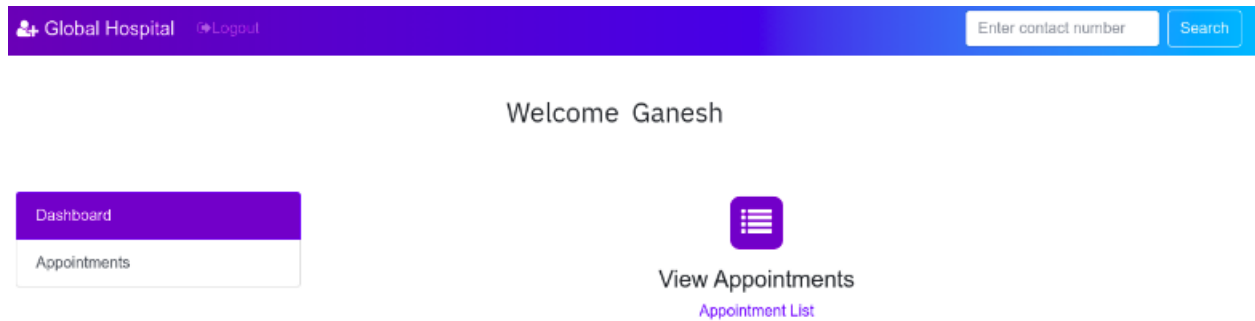

Fig 1.11

In this page, doctors are able to see their appointments which has been booked by the patients. Fig 1.12 shows the appointment of the doctor 'Ganesh' which has been booked by the patient 'Kenny Sebastian' (Fig 1.6). This means that the doctor 'Ganesh' will have an appointment with the patient 'Kenny Sebastian' on 10-10-2019 10AM.

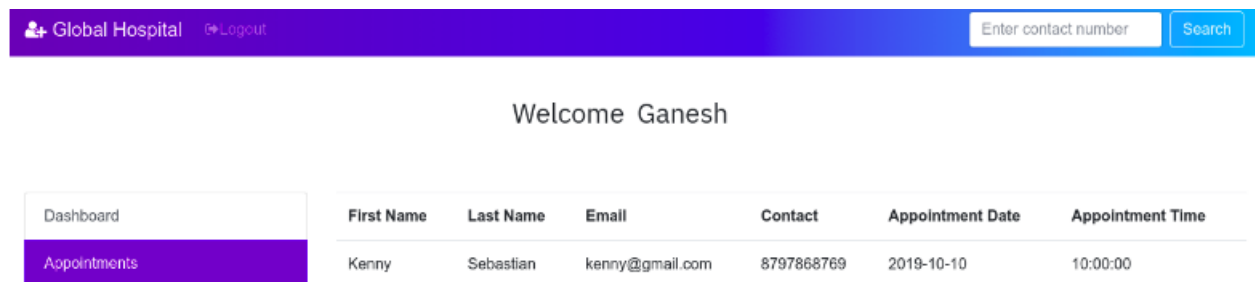

Fig 1.12

In real-time, the doctors will have thousands of appointments. It will be easier for a doctor to search for appointments in the case of more appointments. To make it easier, I have a 'Search' box in the navigation bar (See Fig 1.12) which allows doctors to search for a patient by their contact number. Once everything is done, the doctor can logout of their account. Thus, in general, a doctor can login into his/her account, view their appointments and search for a patient. This is all about Doctor Module.

Admin Module:

This module is the heart of our project where an admin can see the list of all patients. Doctors and appointments and the feedback/queries received from the 'Contact' page. Also, the admin can add a doctor too.

Login into the admin account can be done by toggling into the admin tab of the Home page. Fig 1.13 shows the login page for admin

- username: admin
- password: admin123

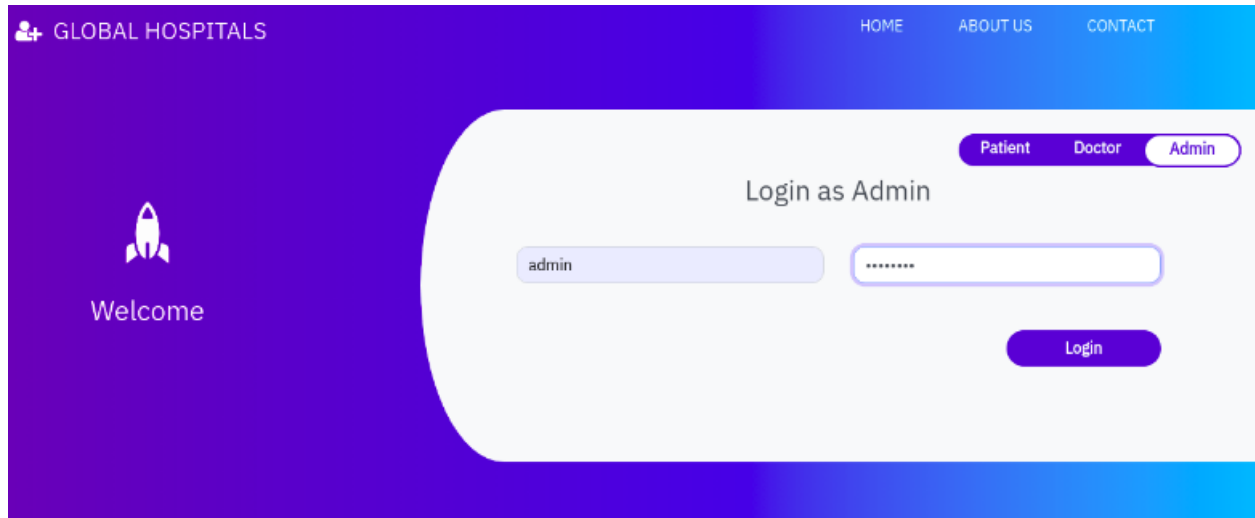

Fig 1.13

On clicking the 'Login' button, the admin will be redirected to his/her dashboard as shown in Fig 1.14.

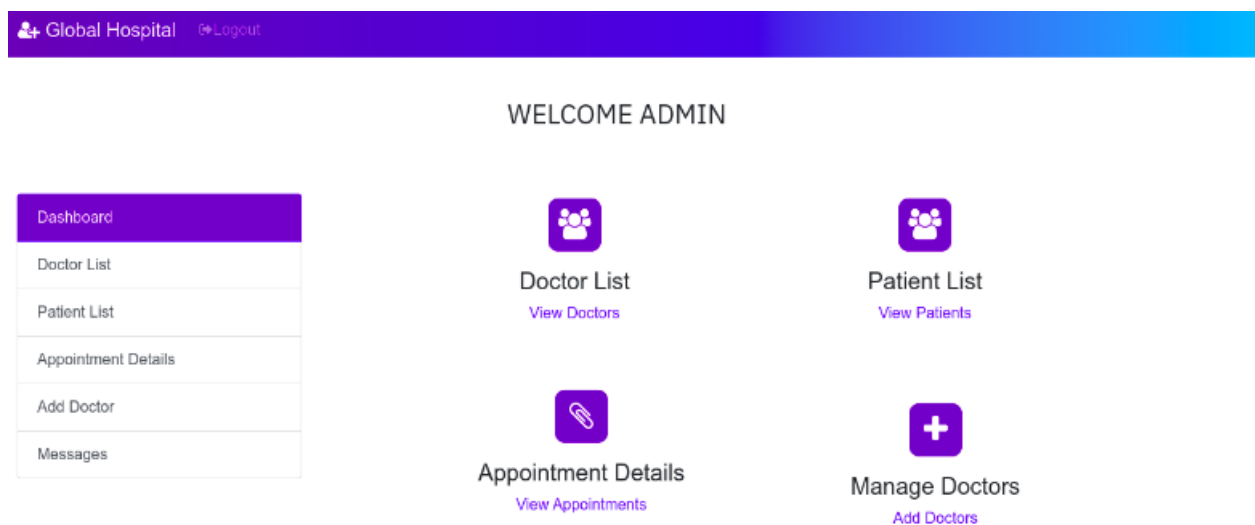

Fig 1.14

This module allows an admin to perform five major operations:

1. View the list of all patients registered:

Admin can view all the patients registered. This includes the patients' First Name, Last Name, Email ID, Contact Number and Password. (See Fig 1.15). As like in doctor module, admin can also search for a patient by their contact number in the search box.

4. Add Doctor:

Admin alone can add a new doctor since anyone can register as a doctor if we put this section on the home page. This form asks Doctor's Name, Email ID, Password and his/her Consultancy Fees.(See Fig 1.18)

Asiq	asiq@gmail.com	9087897564	Love your service. Thank you!

Fig 1.20

Taking everything into consideration, admin can view the details of patients and doctors, appointment details, Feedback by the user and can add a new doctor. Once everything is done, the admin can log out from his account.

Updates

1. Cancel Appointments

Patients and doctors can delete their appointments.

Global Hospital

Logout

Welcome Kishan Lal

Dashboard

Book Appointment

Appointment History

Doctor Name	Consultancy Fees	Appointment Date	Appointment Time	Current Status	Action
Ganesh	550	2020-02-14	10:00:00	Cancelled by Doctor	Cancelled
Dinesh	700	2020-02-28	10:00:00	Cancelled by You	Cancelled
Amit	1000	2020-02-19	03:00:00	Cancelled by You	Cancelled
Dinesh	700	2020-02-28	12:00:00	Active	Cancel
Ganesh	550	2020-02-26	15:00:00	Active	Cancel

If the patient deletes the last record (for doctor Ganesh), then a label "deleted by you" will be displayed in the column 'Current Status' and the action will change to cancel state.
